

# Programming Homework Help

"I have mastered four languages on my own in two years, says the NEW York programmer Dmitry Karpov. Now you can find a lot of training materials, so it's not a problem. The main thing is to understand the idea, the essence of the process, and practice." And for those who are afraid to go to this voyage, there are many courses in all major cities of USA. Some training centers even help to find a job.

## WHO WANTS TO WRITE CODES

The training centers note that the demand for programming courses is now quite high. "Come people who want to retrain, find a new job says the Director of the Training center" Contact (Kiev) Evgeny Krylov. That was a man mechanic, and wants to become a programmer. We explain that this is possible, but it will take time. Also, students often come to pull up a particular language, to pass the exam."

Since IT is one of the few areas that continue to develop rapidly without regard to political entanglements, it attracts people of different professions. "Most often engineers, private entrepreneurs, Bank employees come. Now there are cuts, so people have to change specialty", -says the Manager of the Training it-center Level Up (Dnepropetrovsk) Lilia Kochetkova.

THE CASE OF THE YOUNG. Young people aged 17-30 usually decide to master the profession. "With age, the ability to learn decreases, and after 30 to learn programming is very difficult," says Evgeny Krylov. But Lily Kochetkova is not so categorical: "we learn people from 20 to 50. The oldest student was 54 years old, he studied the programming language PHP and is now successfully developing websites to order".

### [Programming Homework Help](#)

Men in the courses are usually more than women, although in recent years the fair sex are increasingly interested in working in the field of IT. "We have a lot of girls, and we are happy with them, says Kochetkova. So, in the last release of Java was a few very sensible, which immediately invited to work.

The training centers recognize that not everyone can become a programmer. "The ability to think logically is important here," said Lilia Kochetkova. "A programmer is a way of thinking and a way of life. Even if a person graduated from KPI with honors, it does not mean that he will become a good programmer," said Evgeny Krylov. The main thing in this business desire. "Teachers will do everything possible, says the administrator of the Lviv center of computer training" Logos Rostislav Tiyak. "But the result largely depends on the listeners themselves."

The courses usually offer to learn [PHP](#), [Java](#), [C++](#), [C#](#), [JavaScript](#) and other programming languages. The most popular in USA today is Java, it is used both for web programming and for other purposes. "We just have a hot phone everyone wants to Java says Lily Kochetkova. "The groups are small, 12 people each, so people sign up in advance, waiting for their turn." "Java is in demand because foreign companies mainly use this programming language," adds Evgeny Krylov.

## Homework Help

Also, many courses are written in PHP language to generate web applications. As a rule, PHP course is shorter than others. But to create sites, you must first learn HTML-language markup web pages, and cascading style sheets (CSS) language to describe their appearance (learn in the course of "Web design"). However, these languages can be mastered independently from textbooks. Also, web programmers will benefit from knowledge of JavaScript (needed to make the page interactive).
